

It's time to  
**SWITCH**  
to Agilent – the LC  
technology leader!

## Switch to Agilent – TODAY!

With a wide range of recent innovative contributions to LC technology, there has never been a better time than now to switch to a new LC from the Agilent 1200 Infinity Series portfolio.

### Infinitely more affordable

The Agilent 1220 Infinity LC is a high quality, integrated system for routine HPLC and advanced UHPLC analysis, for maximum return on investment.

### Infinitely more confident

The Agilent 1260 Infinity LC raises the standard in HPLC – without raising the price. It offers new levels of productivity, data quality and robustness to give you highest confidence in your investment.

### Infinitely more powerful

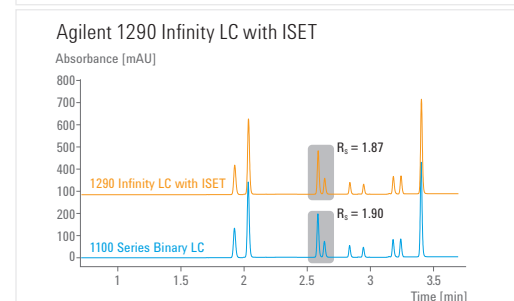

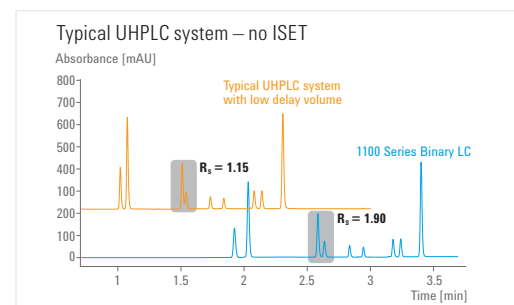

The Agilent 1290 Infinity LC is the last word in chromatographic performance providing highest speed, resolution and sensitivity – now with ISET\*.

## No more method transfer problems!

Run your existing HPLC methods, or your latest UHPLC methods up to 600 bar, on any Agilent 1200 Infinity Series LC while obtaining unchanged chromatographic results.

For even more flexibility, the 1290 Infinity LC with ISET\* facilitates method transfer between different vendors' LCs.

## Benefits:

- No shifts in retention time
- No changes in peak resolution
- No need to modify your method or instrument hardware\*

\* ISET – Intelligent System Emulation Technology

# INFINITELY BETTER REASONS TO SWITCH

## No more software control issues!

Agilent OpenLAB CDS provides the ideal solution for control of Agilent LCs.

Agilent is also committed to supporting control on other software platforms – regardless of whether you are using Waters Empower 2/3, Dionex Chromeleon 6.8/7.0, Bruker Daltonics Compass/Hystar or many other CDS. The new Agilent Instrument Control Framework (ICF) makes this possible!

Agilent ICF is a software component that can be embedded in any CDS platform, enabling the use of standard instrument drivers from Agilent and eliminating the need for CDS providers to develop custom drivers for their platform.

Contact your CDS provider today to find out when they plan to implement Agilent ICF.

## No more budget constraints!

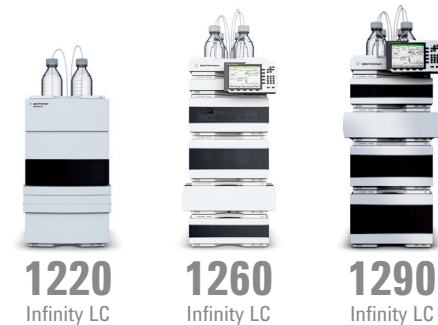

- Choose from 55 Agilent 1200 Infinity Series modules to configure your personal, best-price UHPLC system — starting at \$15,000.
- Get a 3-5 year up-and-running guarantee for your system – FREE!

No more methods transfer problems!

No more software control issues!

No more budget constraints!
