Polymeric SPE

Strata[®] GCB

High Quality Graphitized
Carbon Black SPE Clean-Up

Strata GCB

Graphitized carbon black is a non-porous multi-mode type of SPE that extracts very polar and non polar analytes. GCB results in high recoveries of pesticides from water, fruits, and vegetables and also works well at removing pigment from sample matrices.

Recommended Applications:

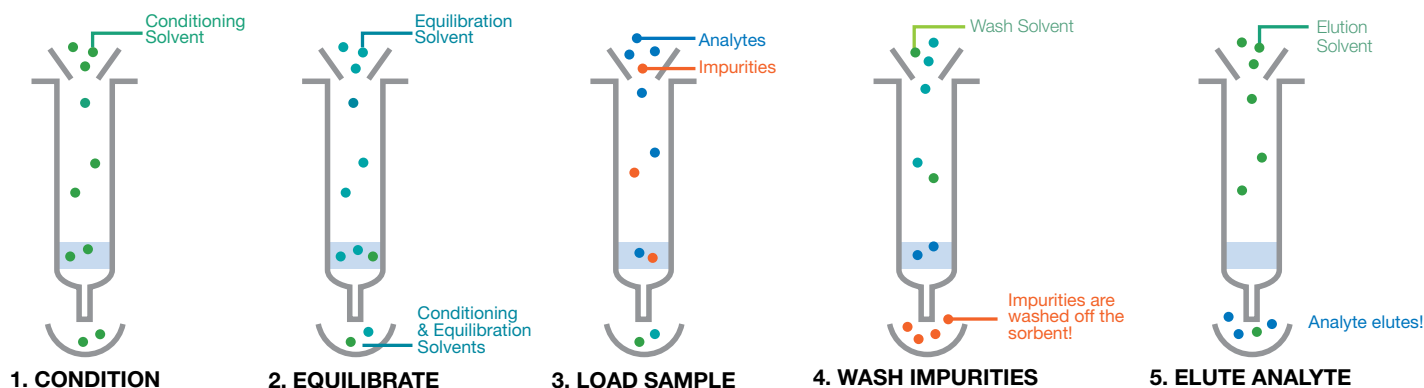

- Pigment Removal
- Pesticide Extraction
- EPA Method 523
- EPA Method 535
- PFAS (Per- and Poly-Fluoroalkyl Substances) Extraction

Strata GCB

Part No.	Description	Unit
8B-S528-FCH	Strata GCB 250/6 mL Tubes	30/pk
8B-S528-HCH	Strata GCB 500/6 mL Tubes	30/pk
